A schematic diagram of a two-ported laparoscopic approach. A vertical black line at the top represents the abdominal wall, with a circle labeled 'J' indicating the umbilicus. Two lines diverge from the abdominal wall to represent the laparoscopic ports. Below the ports are two trapezoidal shapes representing the lungs, labeled 'L' and 'R'. At the bottom of each lung is a rounded, shaded area representing the retroperitoneum, labeled '4' and '5' respectively. Dashed lines within the retroperitoneal areas indicate the location of the tumor. The diagram illustrates the spatial relationship between the ports, lungs, and retroperitoneum during a laparoscopic procedure.
